

Application Form PDF

Example Round

Grant Type	PhD
Applicant	Ms E Example
Grant Title	Example project
Total Requested	.00
Grant Start Date	17/09/2023
Grant Duration	36
Reference number	009

Application summary

Project Title	Example project
Will the PhD be full time or part time?	Full time
Project Duration If you have selected "full time" above please make sure that you do not add a duration longer than 36 months	
36	
Project Start Date	17/09/2023
Host Organisation Please note, that with regard to eligibility for funding, the Principal Investigator (PI) must be based at a UK institution.	
University	
Post at host organisation	Post
If the lead applicant is a PhD student or prospective PhD student, please confirm that the supervisor and head of department are aware of the application	
N/A as the lead applicant is not a (prospective) PhD student	
Host organisation address	
Address line 1	Address line 1
Address line 2	Address Line 2
Address line 3	
Town/City	Town
Country	Country
Postcode	Postcode
Research subject area	Other
Please specify	Select themes as appropriate

Research proposal summary

Lay Summary

(no more than 250 words, language for a non-scientific audience summarising the unmet need, research question, methods, and potential impact for patients)

Lay summary

Research summary (for a scientific audience)::

Background, Aim, Design, Key Goals and Outputs

Research overview

Is this or a similar application for funding currently under consideration elsewhere?

No

Your research vision**Describe your research vision**

Please use the following headings when describing your proposal:

1. Aims and research questions.
2. Importance (need for research in this area in terms of bowel research) and originality.
3. Research plans (study design, experimental approaches, techniques, pilot data and data analysis and feasibility; where possible include a series of milestones with appropriate objectives and timescales e.g. identify major risks and uncertainties and how these will be tackled).

Research vision

Scientific potential (people, environment and track record).

Scientific potential

Exploitation, dissemination and public engagement (including for pilot studies how funding will be sought for definitive studies)

Exploitation, dissemination and public engagement

Provide an outputs management plan.

Describe how you plan to maximise the impact of your significant research outputs to improve health and benefit the wider bowel research community.

Outputs management plan

"Hard to Fund" fund

BRUK committed to supporting under-researched topics through the "Hard to Fund" fund (HTFF), with 10-25% of our awards going towards these applications that center these topics. BRUK has identified six main criteria for assessing applications for HTFF projects, these are:

- Rare conditions or those that are common but under-researched due to their "unglamorous" nature
- Different research methodologies, for example qualitative hypothesis-generating studies
- Emerging technologies or ideas
- Long-term quality of life after treatment
- Under-represented populations
- Cross-disciplinary research

For more information on the HTFF criteria, please visit our "Grant FAQs" page.

Which of the following does your application cover? Select one or more categories if applicable:

Team composition and management

Name	Ms E Example
Department at Host Organisation	Department
Role in Project	PI

Team

Is one of the applicants a member of the ACPGBI? Bowel Research UK is obliged to award at least 50% of funding to applications in which at least one of the investigators is member of the Association of Coloproctology of Great Britain and Ireland (ACPGBI). For more information about membership categories, please visit: https://www.acpgbi.org.uk/about/membership/categories.aspx To apply for membership, please visit: https://www.acpgbi.org.uk/about/membership/apply.aspx
No

Project Management and Leadership Please describe the oversight arrangements for the study. For example, PhD supervision, the membership and composition of the Steering Group or Project Management Group, Data Monitoring Board etc...
Project management and leadership

Additional Details

Will ethical approval be required for this study?	No
--	----

Please detail any commercial involvement in the research.
--

Commercial involvement if applicable

Are any collaborations essential for this proposal?
--

This could be through sharing facilities, providing access to resources (essential reagents, samples, data) or sharing subject-specific knowledge and guidance.

No

Will you be using facilities, staff or patients within the National Health Service (NHS) in the UK?
--

No

Patient and Public Involvement and Engagement

Development and Delivery of the Research

- How have you involved patients, participants, patient advocacy groups or communities in developing this proposal?
- What ongoing involvement will they have in the research?

PPI

Are you planning to involve Bowel Research UK's People and Research Together (PaRT) network?

Yes

How are you planning to incorporate them?

Plans for PaRT network when applicable

Working with Bowel Research UK

Bowel Research UK is a registered charity and aims to grow in order to fund more research. Please detail how you may help to promote the charity and its work to your network.

Promotion of Bowel Research UK

Financial details

	Year 1	Year 2	Year 3	Total
Salaries	0.00	0.00	0.00	0.00
Materials and consumables	0.00	0.00	0.00	0.00
Other	0.00	0.00	0.00	0.00
Total	0.00	0.00	0.00	0.00

Salaries**Material and consumables****Other**

Justification for resources and equipment requested in terms of scientific need.
Resource justification

Conflicting interests: consultancies, financial and family interests

Do any of the applicants or supervisors/sponsors have consultancies or conflicts of interest such as financial or family involvement in companies or other organisations that might have an interest in the results of the proposed research?

No

Will the proposed research use technology, materials or other inventions that, as far as you are aware, are subject to any patents or other form of intellectual property protection?

No

Is the proposed research, in whole or in part, subject to any agreements with commercial, academic or other organisations?

No

Is the proposed research likely to lead to any patentable or commercially exploitable results?

No

If any potentially commercially exploitable results may be based upon tissues or samples derived from human participants, please confirm that there has been appropriate informed consent for such use.

n/a
